Columbus, OH 43215 ☐ Fax: 614.460.3973

Families are invited to learn more about different aspects of safety, including water, fire, bike and household safety, poison control, and car seat use. This event is **FREE** and open to the public.

The goal of Project Safe Child is to educate parents and children on how to implement safety tips in their household and ultimately live safer lives. Parents can make an appointment to have their car seat(s) inspected by certified technicians from the Safe Kids Coalition and the Ohio Department of Public Safety online at www.10tv.com. Parents without an appointment may experience a longer wait. The event is the largest one-day car seat check in the state of Ohio.

Prevention is the cure. It's estimated that by taking simple precautions, almost 90 percent of unintentional injuries can be avoided.
