

have you been diagnosed with mTBI? mild traumatic brain injury

The Kettering Health Network Innovation Center is conducting a study to learn more about the brain effected by TBI.

If you are between the ages of 18 and 55 and experienced your TBI two years ago or less, you may be eligible for this study. Please consider calling the number below.

The purpose of this study is to learn more about how the brain changes when damaged by TBI. This study involves about ½ day of time, being asked questions by an interviewer that tell us more about how your brain is functioning, and taking a picture of your brain with an MRI machine. All participants will be paid \$250. To find out more about this study, tear off and call the number below.
